Todopy by Kanyinda Muepu Samuel This Project is a simple "Todo" web application
which has a User registration et login functionalities, to add/delete/rank(prioritize) tasks in the todo list. LOVE NOT HATE by BRENDA CALISKANALP This is a 2-player game represented by 2 unicorns as my sprites, wherein 1 is considered a 'good' one(the normal-looking unicorn) and the other one (who is posed like scaring someone) is the bad character in our
 game.Basically the mechanics of the game is that the bad one would have to chase the good one around within the duration of 60 seconds(as shown on the upper left timer). How to move the sprites is by pressing the 'right', 'left', 'up', 'down' keys for the good one, as
indicated by a sound, it means game is over and unfortunately 'hate' wins. However, if the time ends and the bad unicorn fails to collide with the other, symbolically, love wins over hate. If the player/s wish/es to play again, he/she can do so by simply making the characters move again by pressing the keys mentioned above. On the other hand, how to quit is simply by
 Problems by Roxana Dicusara This website was designed to present the world's biggest problems and ways to help.
